

The German company G.Bee designs, develops and manufactures ball valves and safety valves, including manual ball valves and automatic ball valves with electric or pneumatic actuators combined with drivers, position indicators, limit switches and electric solenoid valves for the automation of industrial applications, like flow regulation of the fluids, shut-off, safety, e.t.c.

Manufactures Thermally Released shut-off Valves, Fire-Safe with sensors for the shut-off of the gas flow in case of a fire indication.

Manufactures all the types of ball valves with optional the above mentioned equipment for total management of all the types of fluids such as gas, drinking water, water, steam, compressed air, fluids of chemical industry, fluids of pharmaceutical industry, fluids of food industry, oils, solvents, aggressive mediums, liquid fuels, according to strict German and European specifications as per DIN, DVGW, ATEX, HTB, Fire-Safe (BS6755), TA-LUFT, GAD, PED, VdTÜV.

The product range program of the German company G.Bee includes full port, two-ways and multiport, threaded and flanged ball valves with the necessary automatic equipment, where it is needed, and even wafer design ball valves.

It covers sizes from 1/8" (DN4) up to 12" (DN300), for maximum pressures up to 100bar and temperatures up to 400 °C.

The manufacture materials of the products up to the seal systems of the ball and the stem with the body of the products in order to secure the best possible function as well as the seal to the direction of the flow line up to the minimum possible leak via the stem to the external environment, depending on the application is brass, nodular graphite cast iron (GGG40), steel, stainless steel (1.4408), PTFE, fiber glass, TFM, EPDM, FKM, graphite and antimony coal.

## Ball Valves & Safety Valves

- ✓ Natural Gas
- ✓ Liquid Gas
- ✓ Biogas
- ✓ Water / Drinking Water
- ✓ Steam
- ✓ Compressed Air
- ✓ Beverages
- ✓ Foods
- ✓ Oils
- ✓ Solvents
- ✓ Aggressive Mediums
- ✓ Fuels
- ✓ Chemicals
- ✓ District Heating
