

The company Schuck welcomes you!

Who we are? Who is Schuck?

Schuck designs and manufactures products respecting all important German and International Standards and Specifications as DIN, ISO, DVGW, ÖVGW, HTB, API, ASME, BS 6755.

What we do? What Schuck does?

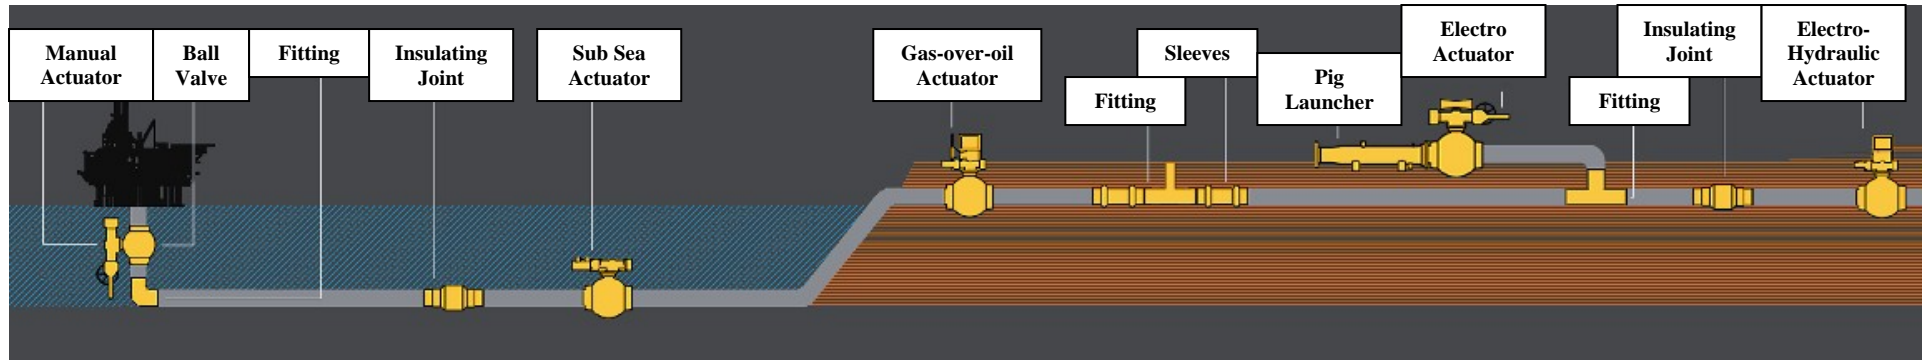

- we set the standards worldwide
- we supply all the various systems used to deliver gas, oil, water and district heating
- all of our products and services are carefully coordinated with one-another
- we have more than 100 patents worldwide
- we develop unique products and intelligent solutions designed to meet precise requirements
- we manufacture ball valves with manual actuators, electro-actuators, electro-hydraulic, hydraulic and pneumatic actuators, fittings, insulator joints, jet control check valves, sub sea actuators, gas-over-oil actuators, sleeves, pig launchers, underground installation ball valves from PE or Steel, PE-St transition joints, house-lead-in single and multiple service ducts for wet or dry installations with fire safe ball valve

SCHUCK connects

All these are products for pipe line distribution and products for pipe line transport. For Schuck systems there is no limitation concerning nominal diameters and pressure values due to Schuck modern manufacturing process. Generally for ball valves and other products in standard version cover the pressure range up to ANSI 2500 (PN400) and to sizes up to 104 inches.

The standard of quality that these products are required to meet becomes the criterion for a company's technical competency. The above mentioned products meet these strict requirements. Schuck is setting the standard worldwide is partner of the most energy, distribution companies worldwide. The international energy suppliers appreciate the advantages that come with compatibility, functionality, safety, reliable warranties and efficiency.

The whole is more than just the sum of the single products
